### **Character Breakdown:**

The characters of Team Of Monkeys Maze consists of a team of monkeys that has been trained to perform some kind of human task. By breaking the task down into individual actions and designating a monkey for each action, the monkey teams are able to achieve human feats. In addition, there are also supervisory monkeys, as well as the occasional back-up and spare monkeys for critical tasks. Nearly each panel is a different team.

### **Plot Theme:**

Team Of Monkeys Maze is based on what an ad might look like for a marketing campaign that would be used to promote monkey teams. Each panel highlights the team's ability and qualifies them to potential buyers.

### **Artist's note:**

Each comic panel is also a functional maze, with entrances and exits marked by arrows.
